SUMMARY

Senior Unity/C# developer with 7+ years of professional game development, currently working remotely for Inventix Games (Saudi Arabia). CTO at Cipher Coders, leading and mentoring a development team for 4+ years. Ships games for Android, iOS and PC, including Pizza Rush (50K+ downloads), with hands-on experience in gameplay systems, multiplayer (Photon Fusion, FishNet, Socket.IO, WebSockets), game AI, LLM integration, Firebase and AdMob.

SKILLS

Core: Unity, C#, OOP, gameplay programming, URP, UGUI, TextMeshPro, ScriptableObjects, Addressables, DOTween, Cinemachine, Timeline, NavMesh, New Input System, Unity Profiler, performance optimization

Multiplayer: Photon Fusion, FishNet, Socket.IO, WebSockets, lobby matchmaking, client-server synchronization

Services & Monetization: Firebase (Auth, Firestore, Realtime Database, Storage), REST APIs, LLM integration, Google AdMob, Unity IAP

Platforms & Tools: Android / Google Play, iOS, PC, Git, GitHub, Autodesk Maya, Photoshop

EXPERIENCE

Senior Game Developer — Inventix Games Holding SJSC, Saudi Arabia (Remote) | Jul 2026 – Present

- Lead gameplay development and scalable game systems in Unity/C# on DownSize, including multiplayer (Photon Fusion, FishNet), UI integration and performance optimization.
- Contribute to architecture and technical decisions; run code reviews, task planning and team guidance.

Chief Technology Officer (Jan 2023 – Present) · **Senior Unity Developer** (Jan 2022 – Dec 2022) — Cipher Coders, Pakistan

- Lead and mentor the development team; allocate tasks by capability and deadline and run code reviews against team C# standards.
- Architect and optimize core game systems built for scalability and reuse across titles.
- Shipped mobile games to Google Play, including Pizza Rush (50K+ downloads).
- Integrated AdMob and Firebase (Auth, Firestore, Realtime Database, Storage) into production titles.

Game Development Instructor (Contract) — TEVTA Punjab, Pakistan | May 2024 – Aug 2024

Game Developer — Nerds Studio, Pakistan | Dec 2020 – Dec 2021

- Developed gameplay mechanics and features in Unity/C# across multiple game projects.
- Debugged and optimized performance across multiple platforms; built prototypes to validate new game concepts.

Game Developer — Phoenix Digitals, Pakistan | Jan 2019 – Nov 2020

- Implemented multiplayer functionality, including client-server communication and state synchronization.
- Developed AI behaviour for opponents and allies, plus gameplay, controls and UI for client projects.

Freelance Unity Developer — Fiverr (Remote) | Sep 2019 – Jun 2024

- Delivered Unity/C# game development and level design work for freelance clients.

Earlier: Game art and level design roles at GameByteStudio, The Knights and Allied Consultant (2016–2018)

SELECTED PROJECTS

- Buraco Plus** — Multiplayer card game, client project (2026). Online Buraco with Classic and Professional rules, lobby matchmaking and every move synced live across the table. *Unity, C#, Photon Fusion, Socket.IO, NestJS*
- Hide and Seek** — Multiplayer mobile game (2024). Online hide-and-seek with timed rounds and roles switching every round. *Unity, C#, Photon Fusion*
- Elm Kiosk** — AI kiosk app, client project (2026). 3D character answers visitor questions via a server-side LLM, spoken back with real-time lip sync. *Unity, WebSockets, LLM, SALSA LipSync*
- The Fourth Impossible** — PC game, technical lead (2025). Book adaptation with melee combat, a designer-extensible quest system and in-engine cutscenes; led the technical side through release. *Unity, C#, Timeline*
- Misadventures of Samson** — Endless runner, client project (2026). 3D runner for Android and iOS with missions, unlockable outfits and an in-app purchase store. *Unity 6, URP, Unity IAP*
- Competitive Survival Merge Defense** — Android tower defense, client project (2026). Six-unit decks, merge mechanics, escalating waves and boss fights. *Unity 6, URP 2D, C#*
- Pizza Rush** — Casual cooking game, Cipher Coders, Google Play, 50K+ downloads. *Unity, C#, AdMob, Android*

EDUCATION & LANGUAGES

BS Computer Science — University of Central Punjab, Lahore, 2017

Languages: English (professional working proficiency), Urdu (native)
